Hi Jessie,

Please see email (below) from Tay from 2/19/20. Is this ok for construction on Lots 9 and 10?

I spoke with Noel today. As for the drainage system on Lot 9, the temporary system will be in use until the permanent system is built. Now that the ground has been compacted, they can start building the system starting downhill to uphill.

Work (land disturbance/tree and vegetation removal) will not start on Lot 11 until the BLD permit is issued.

Please let me know if you need anything else

Thanks

Hi Noel,
No nests or nesting behavior detected on lots 9 & 10 this morning. No new woodrat houses noted.

Thanks for the payment.
